

Wrapup

Nicolas M. Thiéry

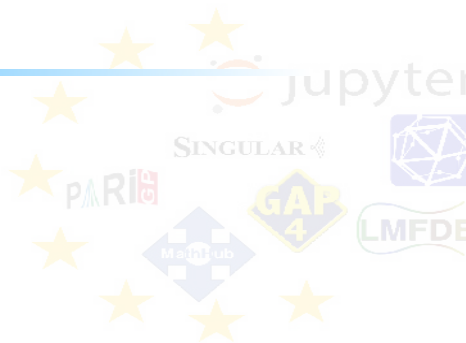

October 30, 2018

Bold aims!

Bold aims!

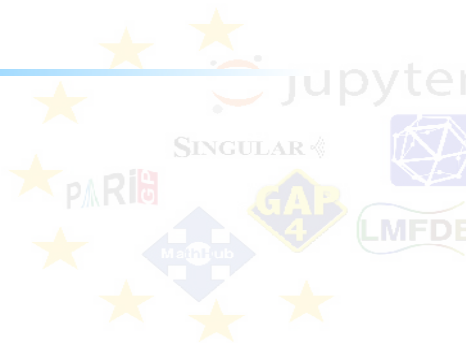

Yet we deliver

Bold aims!

Yet we deliver

Keys to success

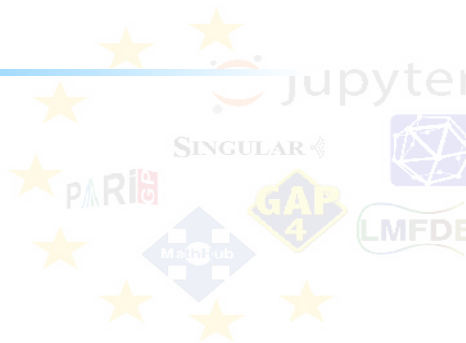

Bold aims!

Yet we deliver

Keys to success

- Building a toolkit

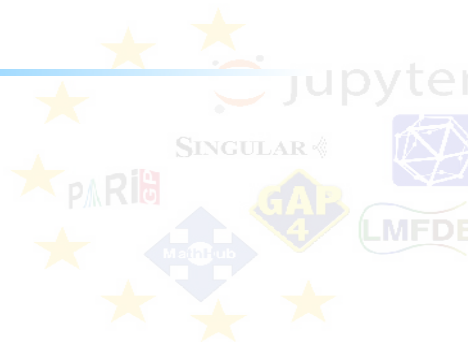

Bold aims!

Yet we deliver

Keys to success

- ▶ Building a toolkit
- ▶ Being part of a larger movement

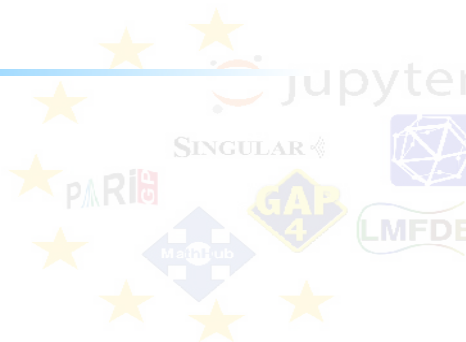

Bold aims!

Yet we deliver

Keys to success

- ▶ Building a toolkit
- ▶ Being part of a larger movement
- ▶ Identifying hard hurdles that prevent the ball from rolling ...

Bold aims!

Yet we deliver

Keys to success

- ▶ Building a toolkit
- ▶ Being part of a larger movement
- ▶ Identifying hard hurdles that prevent the ball from rolling ...
and knocking them down ...

Bold aims!

Yet we deliver

Keys to success

- ▶ Building a toolkit
- ▶ Being part of a larger movement
- ▶ Identifying hard hurdles that prevent the ball from rolling ...
and knocking them down ...
thanks to the the large resources entrusted to us by the EU citizens

Bold aims!

Yet we deliver

Keys to success

- ▶ Building a toolkit
- ▶ Being part of a larger movement
- ▶ Identifying hard hurdles that prevent the ball from rolling ...
and knocking them down ...
thanks to the the large resources entrusted to us by the EU citizens
- ▶ Great people!

Bold aims!

Yet we deliver

Keys to success

- ▶ Building a toolkit
- ▶ Being part of a larger movement
- ▶ Identifying hard hurdles that prevent the ball from rolling ...
and knocking them down ...
thanks to the the large resources entrusted to us by the EU citizens
- ▶ Great people!

Dearest to my heart

Yet we deliver

Keys to success

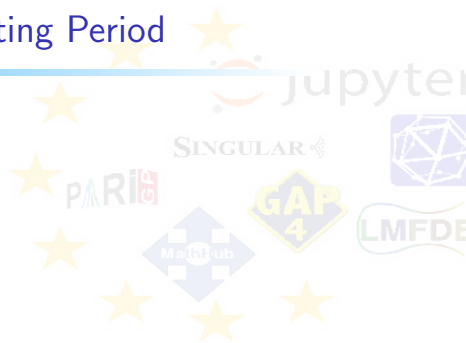

- ▶ Building a toolkit
- ▶ Being part of a larger movement
- ▶ Identifying hard hurdles that prevent the ball from rolling ...
and knocking them down ...
thanks to the the large resources entrusted to us by the EU citizens
- ▶ Great people!

Dearest to my heart

We help bring communities together

What's next for the 3rd Reporting Period

We already delivered a VRE toolkit

What's next for the 3rd Reporting Period

We already delivered a VRE toolkit, deployed and used!

What's next for the 3rd Reporting Period

We already delivered a VRE toolkit, deployed and used!

Features to bring from prototype to production:

- ▶ live collaboration
- ▶ high performance
- ▶ tighter integration between components, at low and high level
- ▶ software stack flexibility
- ▶ ease of deployment
- ▶ ...

- Sustainability built into the approach

- ▶ Sustainability built into the approach
- ▶ Keep accelerating and steering the ball

- ▶ Sustainability built into the approach
- ▶ Keep accelerating and steering the ball
- ▶ Something special about the spirit of this community

- ▶ Sustainability built into the approach
- ▶ Keep accelerating and steering the ball
- ▶ Something special about the spirit of this community
- ▶ We hired great people

- ▶ Sustainability built into the approach
- ▶ Keep accelerating and steering the ball
- ▶ Something special about the spirit of this community
- ▶ We hired great people; career paths?

Future funding: NumFOCUS

Nice fact: Companies use computational open source software

Future funding: NumFOCUS

Nice fact: Companies use computational open source software
And want to contribute back financially!

Future funding: NumFOCUS

Nice fact: Companies use computational open source software
And want to contribute back financially!

Problem: This requires some legal entity

Future funding: NumFOCUS

Nice fact: Companies use computational open source software
And want to contribute back financially!

Problem: This requires some legal entity

Solution: NumFOCUS, a not-for-profit umbrella association

Future funding: NumFOCUS

Nice fact: Companies use computational open source software
And want to contribute back financially!

Problem: This requires some legal entity

Solution: NumFOCUS, a not-for-profit umbrella association

ODK actions: Contribution to the creation of NumFOCUS Europe

Future funding: European Open Science Cloud calls

Call: INFRAEOSC-02-2019

Deadline: January 2018

Scope: Jupyter centric proposal; demonstrators in various areas of science?

Leader: Min-Ragan Kelley?

Potential partners: EGI, CERN, INSERM, QuantStack, ...

Future funding: COST network

Scope: Computational mathematics

Leader: Nicolas?

Funding for: community building, conferences; no RSE!

Future funding: Challenges

- ▶ Running a project the scale of ODK takes a lot of overhead

Future funding: Challenges

- ▶ Running a project the scale of ODK takes a lot of overhead
- ▶ Major investment, in particular for the coordinator

Future funding: Challenges

- ▶ Running a project the scale of ODK takes a lot of overhead
- ▶ Major investment, in particular for the coordinator
- ▶ No fitting calls so far for computational mathematics

Future funding: Challenges

- ▶ Running a project the scale of ODK takes a lot of overhead
- ▶ Major investment, in particular for the coordinator
- ▶ No fitting calls so far for computational mathematics
- ▶ Advice would be most welcome!
