ODK's use cases

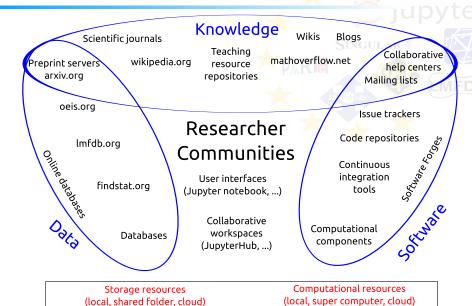

https://opendreamkit.org/tag/use-case

Aims

- Improve the productivity of researchers in pure mathematics and applications by further promoting collaborations on **Data**, **Knowledge**, and **Software**
- Make it easy for teams of researchers of any size to set up custom, collaborative Virtual Research Environments tailored to their specific needs, resources and workflows
- Support the entire life-cycle of computational work in mathematical research, from initial exploration to publication, teaching, and outreach

OpenDreamKit's proposal

OpenDreamKit's proposal

- Deliver a VRE Toolkit for Mathematics
- From the ecosystem of open source software for mathematics
- ▶ And the Jupyter interactive computing environment
